

FCC Commissioners
The Federal Communications Commission RE: Docket 04-435
445 12th Street, SW
Washington, DC 20554

Dear FCC Commissioners ,

The the FCC's proposal to relax the restrictions on the use of cell phones on airplanes in flight is not a good one.

While I do not know if the use of cell phone will interfere with navigation, I believe that it is not known that the cells will not interfere. This is an issue that should not be ignored. Furthermore, the way cigarettes pollute the air in the cabins and interfere with the health and well-being of the passengers, cell phones are noise pollutants, especially in the contained cabin of a plane. It could also make the flight attendants' ability to maintain order in an emergency difficult.

Please no cell phones in the air.

Sincerely,

Emily Lewis
